

# Unleash Your Potential

## our services

## Project Server Proof of Concept (EPM PoC)

### What is EPM PoC?

Our EPM Proof of Concept (EPM PoC) offer, is a package of services designed to facilitate the implementation of an EPM prototype. EPM PoC delivers a live system that uses your own data and is configured to demonstrate how the Microsoft EPM Solution will enable you to meet your business objectives.

### How much does it cost?

EPM PoC has a fixed priced of \$8,500 (plus GST).

### How long will it take?

EPM PoC is a fixed-priced, fixed-scope and *fixed-duration* package. EPM Partners will work with you for *five* working days to deliver the EPM PoC to your workplace. Additionally, the EPM prototype is available to continue your testing after our five-day engagement.

### Do I need to provide hardware or software?

EPM PoC is available in the following configurations:

- Using your internal hardware and software.
- Using your internal hardware with evaluation software.
- Using a fully hosted solution (hardware and software) supplied by EPM Partners, at no additional charge, for a limited period of 12 weeks following the completion of the engagement.

### Can an EPM PoC environment be used as a production environment?

The purpose of an EPM PoC is to demonstrate how the tool could deliver business benefits to your organisation. As a functioning tool it is likely that you will realise some business benefits via the EPM PoC. However the EPM PoC environment will require further configuration before it will support the realisation of full business benefits.

# Project Server PoC (EPM PoC)

## Can an EPM PoC be “upgraded” to a production environment?

Yes. As some of the requirements gathering will be done in order to configure the EPM PoC, if you decide to upgrade to a production installation of Project Server, we will be pleased to offer it at a reduced cost.

## What does EPM PoC include?

- A one day workshop to identify your basic requirements.
- Installation of a fully functioning EPM solution.
- Configuring an EPM solution to meet your *basic* requirements including:
  - Project Management
  - Resource Management
  - Projects and Portfolio Views
  - Dashboards and Reports
  - Project Artefacts Management
- Training EPM PoC users to conduct the PoC.
- Easy to follow, step-by-step guidelines for future usage and testing.

## What are the deliverables?

- A fully functioning hosted, or on site, EPM PoC system.
- An evaluation matrix guide.
- A general usage guide.
- EPM PoC training.

## Why use the Microsoft EPM Solution?

The Microsoft Enterprise Project Management (EPM) Solution is an end-to-end project and portfolio management tool supporting visibility, insight and control across projects and portfolios. It enhances decision-making and improves alignment with business strategy, and importantly, it facilitates resource workload and capacity management.

Through our EPM PoC offer EPM Partners will help you see how Microsoft Project Server can unleash your potential and deliver these business benefits to your organisation. Call us today to find out more.
