

# Developing Business Case for a PMO

## Overview

PMOs are established to serve a purpose and the viability of a PMO is directly tied to delivering that purpose. This course assists in building the business case to establish or maintain a PMO. Having a PMO is not a solution for all problems and it is not the only solution, therefore, the business case draws the connection between the PMO and the business opportunity/problem that it addresses while discussing other available options.
