

RAID Management

Using Microsoft Project Online

Overview

Managing Risks, Assumptions, Issues, and Dependencies (RAID) is a fundamental task for project and portfolio managers. This course focuses on how to effectively manage and report on them using Project Online. It provides a consolidated repository, with alerts and notifications, to the relevant stakeholders and facilitates communication and collaboration with the team.

Duration

4 Hours

Outline

- Understand how RAID management works in Project Online
- Ability to manage the different RAID logs
- Understand RAID reporting and ability to extract lessons to improve project delivery and RAID management process
- Ability to select the right approach to RAID management in your organisation and champion its implementation

Who is this for

- Project Team leaders and project team members
- PMO Managers and PMO Leads
- PMO Supporting Staff
- Project Management Consultants and PMO Analysts
